

AugmentED Logo

The AugmentED logo has been crafted in alignment with other AERDF program identity solutions. The icon and typographic treatment of the wordmark, all work together to express a clever, imaginative, and aspirational brand message. A closer look at the icon and audiences will see a balanced form with equal intersecting parts that come together to infer the letter "A" while forming a stylized wheel - a symbol of invention, progress, and optimism.

These ideas represent the core values of a program that aspires to guide participants, partners, and all stakeholders into the future.

This logo is presented in different formats and color options to work properly in every design. Please observe the guidelines around the logo to ensure consistency of use and visual/aesthetic integrity.
